

Replacement Battery Kit for Tron SART 20/AIS Jotron Radar

The Jotron Replacement Battery Kit PN 82615 includes a lithium/metal battery, seals, and labels required for the 5-year periodic maintenance of Tron SART 20 and AIS-SART models. Designed to ensure maximum efficiency of search and rescue radar systems, the kit complies with the highest maritime safety standards. Warning: This emergency battery is non-rechargeable and must be installed according to the manufacturer's guidelines. Placing the battery in a charger may cause irreversible damage to the equipment.

COD EUROSUL: 004671

IMPA: ---

Part Number: 82615

Approvals: ---

Specifications

Features

Material: Composed of lithium/metal battery and advanced chemical components

Fasteners: Includes seals and labels to ensure secure and reliable installation

Design: Compact, lightweight and engineered for maximum durability and safety

Dimensions: Not specified

Applications

Search and rescue radar systems (SART) used in commercial and emergency vessels

GMDSS equipment for maritime communications in emergency situations

Benefits

Readiness: Ensures SART systems remain operational during emergencies

Durability: 5-year service life, ideal for extended maritime operations

Safety: Non-rechargeable product, preventing misuse risks and prolonging safety system integrity

Technical Specifications

Material: Lithium/metal battery with manganese dioxide

Fasteners: Seals and labels included
