

Rescue quoit with line 30m x 8mm – Lifeboat safety equipment

The rescue quoit is a maritime rescue device consisting of an orange floating ring and a 30-metre line, designed for quick throwing in emergency situations onboard vessels and lifeboats. Easy to handle and throw with precision, it is an essential component of life-saving equipment kits on commercial, offshore, and passenger vessels.

Compliant with SOLAS requirements for lifeboat rescue equipment (BSV), it meets IMPA 330212 standard and ensures rapid recovery of persons in the water during emergency operations at sea.
