

Breathing Apparatus RHZK6 FANGZHAN SCBA

The RHZK6 self-contained breathing apparatus set from FANGZHAN is designed to provide reliable protection in respiratory hazard environments, such as IDLH atmospheres and low-oxygen areas. It is a complete solution with cylinder, face mask, valve, and carrying case, built for practical and safe onboard use.

COD EUROSUL: 000544

Specifications

Overview

Complete open-circuit self-contained breathing apparatus (SCBA), model RHZK6, for respiratory protection in IDLH atmospheres and in environments with oxygen at or below 12.5% at sea level. The set includes the cylinder, facepiece, demand valve, ergonomic harness, and carrying case.

Application and use

Suitable for emergency response, inspection, and incident handling in hazardous atmospheres where safe breathing depends on an independent air supply. It is a practical solution for onboard use and other marine applications requiring immediate respiratory protection.

Construction characteristics

Sub-item	COMPLETE
Model	RHZK6

Color	BLACK
Steel	LIGHT STEEL

Technical specifications

Cylinder capacity (L)	6
Pressao trabalho (bar)	300
Application	RESPIRATORY PROTECTION IN IDLH ATMOSPHERES AND OXYGEN $\leq$ 12.5%

Compliance and certification

SOLAS	Certified for marine application
MED	Module D; MED/3.7; MED/7.1
EN/ISO/IEC	ISO 23269-2:2011

Marking and traceability

SKU	000544

Handling, service life and disposal

Store the set in a dry, clean place protected from impact, excessive heat, and contamination. Perform regular pre-use inspections and follow the manufacturer's maintenance procedures to ensure performance and safety. Dispose of the equipment in accordance with local rules for protective equipment and pressurized components.
