

Red Handheld Pyrotechnic Flare – 1 Minute – 15,000 Candela

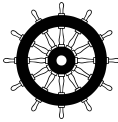

The Eurosul HGY60-15000 Red Hand Flare is a pyrotechnic safety device designed for use in maritime emergencies, providing an intense and long-lasting red light. Suitable for both day and night use, it delivers a minimum luminous intensity of 15,000 candela with a burn time of 60 seconds. The flare complies with international SOLAS standards and is certified in accordance with MED (Ships Wheel) and USCG requirements.

COD EUROSUL: 005110

IMPA: 331364

Part Number: HGY60-15000

Approvals:

Specifications

Features

Material: metallic body with internal pyrotechnic mixture

Design: equipped with metal handle, plastic cap and pull cord ignition

Emission: intense red light visible from long distances

Dimensions: 175 mm x 27 mm x 24 mm

Weight: 160 g

Applications

Commercial and rescue vessels

Offshore platforms

Emergency situations for visual signaling

Benefits

readiness: fast and effective activation in emergency situations

durability: stable during transport and storage, with a shelf life of up to 48 months

safety: tested according to international standards, with visual instructions and protection against accidental ignition

Essential product for emergency signaling in compliance with **SOLAS** and international maritime regulations.
