Specifications

Overview

Brass ship's bell for onboard sound signaling, intended for vessels that need a clear and recognizable audible warning in operation. It is a traditional bridge item, with brass construction and a 300 mm specification for vessels of 20 m or more.

Application and use

Used for mandatory onboard signaling, especially in navigation and collision-prevention situations. The PS/HZ-300 model is intended for ships and delivers a sound pressure level of 110 dB.

Construction characteristics

Material	Brass
