

Standard Horizon SBR-45LIIS Rechargeable Battery for HX400IS Radio

The Standard Horizon SBR-45LIIS rechargeable battery is designed for use with the intrinsically safe HX400IS marine radio. Built with lithium-ion technology, it delivers reliable power, long service life, and dependable performance for marine and industrial operations. With a nominal voltage of 7.2V and 3200 mAh capacity, it provides extended operating time for continuous professional use in demanding environments. The SBR-45LIIS is a reliable replacement battery solution for Standard Horizon HX400IS portable radios.

COD EUROSUL: 097839

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Applications:

HX400IS portable marine radios
Marine and offshore operations
Industrial and hazardous environments

Technical Specifications:

Model: SBR-45LIIS
Type: Rechargeable Li-Ion battery
Nominal voltage: 7.2V
Capacity: 3200 mAh
Compatibility: Standard Horizon HX400IS radio

Application: Intrinsically safe marine radio
