

Storage Locker for Chemical Protective Clothing, Immersion Suits and Firefighter Gear – 35 x 40 x 60 cm

The storage scholarship is designed to ensure safe transport and packaging of Personal Protective Equipment (PPE), such as chemical costumes, immersion clothing and firefighters. Made of high strength material, it provides protection against moisture, dust, grease and contaminating agents, extending equipment life. It has reinforced closure and sturdy seams, ensuring durability in industrial, offshore and emergency environments. Its design facilitates transportation, organization and quick access in critical situations.

COD EUROSUL: 003491

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Material: high resistance synthetic tissue, waterproof and anti-impact

Fixers: High Durability reinforced zipper

Design: Compact and reinforced structure, with ergonomic transport handles

Dimensions: 35 x 40 x 60 cm

Color: Available in red, blue or black (consult availability)

Applications:

Fire brigades and firefighters

Storage of immersion clothing and chemical costumes

Offshore platforms, chemical industries, ports and terminals
SAFE PPE transport to critical environments

Benefits:

Readiness: Fast access and easy transportation of emergency equipment
Durability: high strength materials against tears, humidity and contamination
Security: Protects PPE against physical damage and external agents
Organization: maintains equipment organized and ready for immediate use

Technical Specifications:

Material: Waterproof and resistant synthetic fabric
Dimensions: 35 x 40 x 60 cm
FIXING: Rugged zipper and reinforced handles
Protection: against moisture, dust, grease and contaminants
