Specifications

Overview

CMP750 remote PTT speaker microphone for Entel radios, designed for practical operation and clear communication in the field. It is a robust solution for users who need to talk and listen faster without keeping the radio in hand all the time.

Application and use

Suitable for operational use in wet environments, splash exposure, or occasional water contact, including onboard activities and outdoor areas. Compatible with Entel HT783 and HT700 series radios, it supports mobile, hands-free routines.

Construction characteristics

Microphone element	Electret condenser
Clip	Swivel clip with eight locking positions
Submersible	Yes

Technical specifications

Model	CMP750
IP protection rating	IP67
Submersion	1 m for 30 min
Microphone impedance	< 680 ohms
Speaker impedance	8 ohms

Performance

Rated input	500 mW
Maximum input	1 W
Sound pressure level	80 dBA ± 10 dB

Marking and traceability

Part number	CMP750
Weight	154 g
Dimensions	75 x 60 x 35 mm

Handling, service life and disposal

For best service life, keep the accessory clean and dry after use and avoid prolonged storage in damp locations. Check cables, clip and connectors before operation, and dispose of the product according to local practices for electronic communication accessories.
