Specifications

Overview

Stainless steel wall bracket, strap-type clamp, for 6 kg or 10 L fire extinguishers. It is designed to provide firm mounting and keep the equipment organized in operational areas and quick-access points.

Application and use

Suitable for mounting extinguishers on walls, panels, or designated support points onboard. It helps keep the extinguisher visible, accessible, and correctly positioned for immediate use.

Construction characteristics

Field	Value
Bracket type	clamp
Material	stainless steel
Inox aisi 304	not specified

Technical specifications

Field	Value

Extinguisher capacity (kg)	6 kg / 10 l
Length (cm)	46
Height (cm)	20
Approximate weight	0.96 kg

Handling, service life and disposal

Install on a firm surface and periodically check the fastening and overall condition of the bracket. In normal use, stainless steel provides good corrosion resistance and low maintenance needs; at end of life, dispose of it according to applicable metal recycling practices.
