Specifications

Overview

Cylindrical laser target for the Cyscan MK4 system, intended for commissioning, alignment and maneuvering in navigation applications. Its plastic construction and tubular shape make it a practical visual reference for onboard operational tests.

Application and use

Used in maritime environments to support setup and verification of the Cyscan MK4 system during alignment and validation procedures. It is an operational support item for technical and navigation teams.

Construction characteristics

Material	Plastic
Sub-item	LASER TARGET
Model	CYSCAN MK4

Technical specifications

Width (mm)	200

Length (mm)	1900
Tape reference (m)	1.52
Weight (kg)	10.5

Handling, service life and disposal

Handle carefully to preserve the target geometry and avoid deformation. Store in a dry place, protected from impacts and prolonged sunlight exposure. At end of service life, dispose of it according to applicable environmental practices for plastic materials.
