Specifications

Overview

Spare valve for SCBA cylinder, with integrated pressure gauge and G5/8" connection. It is intended for replacement in self-contained breathing apparatus sets, helping keep the equipment operational with the correct specification.

Application and use

Used on 7 L SCBA cylinders with 300bar working pressure, for replacing the original valve when needed. It is suited to maintenance and component replacement in the breathing apparatus system.

Construction characteristics

Connection	G5/8"
Type of part	Valve
Sub-item	Spare
Has pressure gauge	Yes

Technical specifications

Working pressure	300 bar

Cylinder capacity	7 L
Approx. net weight	0.6 kg
Approx. registered dimensions	13 x 7 x 6 cm

Handling, service life and disposal

Store in a clean, dry place, protected from impact and contamination. Installation should be carried out by a qualified technician following the SCBA set procedure. Replace the part if wear, damage, or performance loss is observed, and dispose of it according to applicable metal-component and vessel maintenance practices.
